Tenure Definitions:

- (a) Shared ownership/equity is defined as: Housing where the occupier of a dwelling buys a proportion of the property and pays rent on the remainder (typically to a Housing Association). The purchaser has the option to buy further shares and there is often a planning condition or legal agreement (e.g. Section 106) so that the property remains affordable in perpetuity.
- (b) Affordable homes are rented above social rent but below market rents. The lower cost is up to 80% of the full local market rent.
- (c) A discounted market home is offered for sale to eligible purchasers at a discounted proportion of the full market value. This is not a shared ownership scheme and even though there is a discount on the sale price, the owner owns 100% of the property. When you want to sell the property you must do so on the same terms, which means you must sell it with the same level of discount you received AND to someone who meets the criteria for affordable housing.

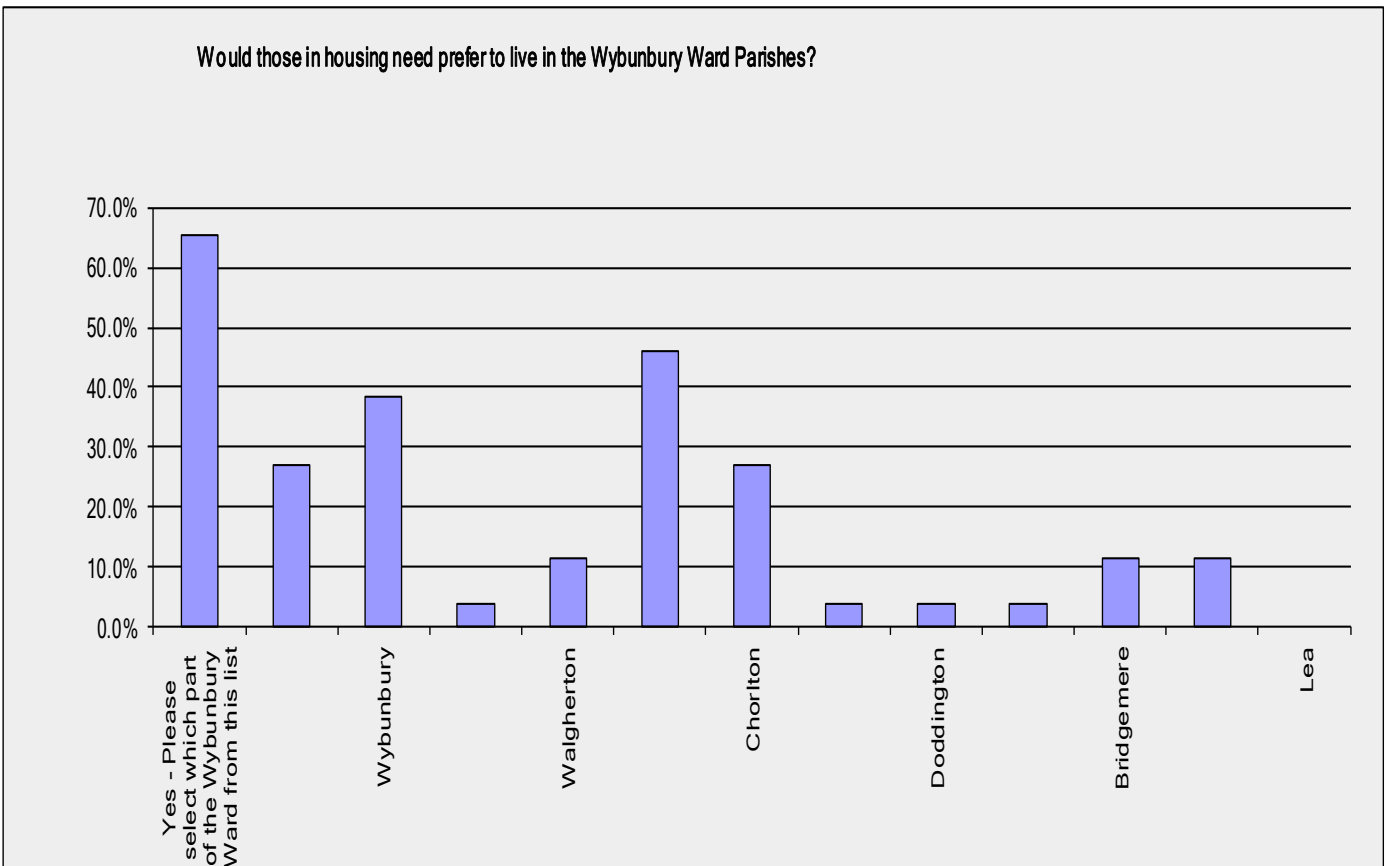

Q11: Results showed that 25 respondents in housing need (92.6%) want to buy a property as their preferred tenure. Other respondents in housing need identified other forms of preferred tenure as shown in the table above.
